

• SHARED BY YOUR FINANCE ADVISOR

The revenue you have earned, but never collected.

LeakIQ finds the money that quietly slips through the gap between your billing and your accounting: price rises that never got applied, payments that failed and were never retried, and work billed twice or not at all. None of it looks wrong on the ledger, which is exactly why it goes unnoticed.

YOUR FREE REVENUE LEAKAGE REPORT

See exactly what is leaking in your own numbers.

A one-off, read-only look at your own billing and accounting data, under NDA. We show you precisely what has leaked, with the source record behind every finding, and the report is yours to keep. No cost, no card, no obligation.

HOW IT WORKS

1

Send a one-off export

Under NDA. Nothing connects to your live systems, and we never change or move anything.

2

We find what is leaking

Every case is tied to the exact source record, so your team can open it and verify it independently.

3

You recover it

You get an itemised report of the money to reclaim, yours to keep whether or not you go further.

Read-only. It never changes your systems or moves your money.

You approve every recovery. Nothing is ever automated.

NDA-backed. We agree an NDA before you share any data.

1-3%

of revenue is commonly lost to leakage before it ever reaches the bank. On most businesses, that is real money worth recovering.

"My team recently started using LeakIQ and found over £49k of leakage across our systems within the first month."

Stephen Jones, Head of Finance

Ask your advisor to arrange your free report, or reach us directly at hello@leakiq.io.

There is nothing to install and nothing to sign up for. The report is a read-only look at your own data.
